

# How To Use Enterprise Blacklist

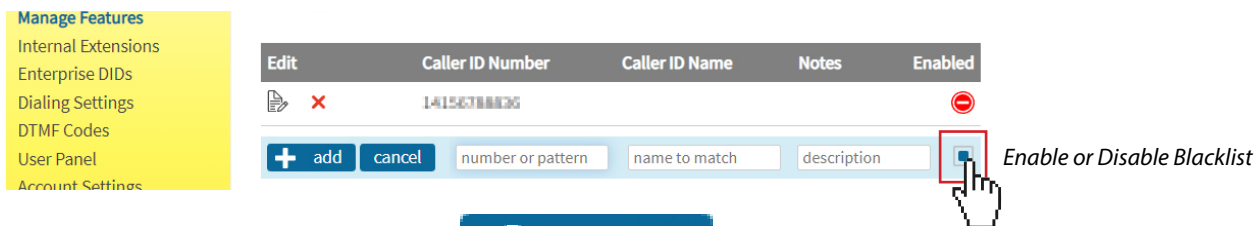

1. Sign into your omnportal with your credentials
2. Go to *Features* > *Manage Features* > *Enterprise Blacklist* > *Configure*

3. Click the **+add** button

4. Fill in the information fields with desired number and information (if you do not have the information for the name and description – it is not needed)

5. Click **+add** button again to save changes
