

# STRUCTURED CABLING FOR VOICE & DATA

Whether you're moving to a new space or upgrading your current system, Smart Choice provides the expertise on infrastructure cabling design and consulting for a wide range of voice, data, and all other network cabling installations.

Our skilled technicians will examine your floor plan and develop an installation strategy to ensure all equipment, conference rooms, offices, desks, and cubicles are connected for maximum speed, efficiency, and reliability — with no exposed wires to trip over or cabling mess to detract from your office surroundings.

## BENEFITS:

### • Expertise

Smart Choice handles all installation logistics, so you can stay focused on running your business.

### • Reliability

Our highly-skilled, trained, and certified installation technicians will test all equipment to ensure optimal speed and operation.

### • Customized Solutions

We'll design and implement a cabling solution to your specific company and industry requirements.

### • Competitive Pricing

Our investment in technology allows us to offer rates comparable to leading telecom providers.

### • No Hidden Fees

We'll conduct a free on-site consultation, followed by a proposal and firm pricing, so there's no "gotcha" surprises.

We also provide Firewall Design/Implementation and Local Area Networking (LAN) Management services.

### IDEAL FOR:

- New construction build-outs
- Retrofitting existing wire
- Rewiring of current space
- Upgrading phone & data systems
