## CALL TRANSFER

- During a call, press the Tran soft key (the active call is placed on hold).
- Place a call to the number to which you want to transfer the call.
- After speaking with the second party, press the Tran soft key to complete the transfer.

Press the Blind soft key to transfer the call without speaking to the second party. Transfer may be cancelled during establishment by pressing the Cancel soft key. The original call is resumed.

## CALL FORWARDING

- To enable call forwarding, press the menu key and select Features and Call Forward.
- Select a forwarding type from Always, No Answer, and Busy.
- For all types, enter a number to forward all future calls to.
- For No Answer, enter the number of rings before forwarding.
- Press the Enable soft key to confirm Call Forwarding. A moving arrow replaces the usual indicator for that line to confirm Call Forwarding is enabled.
  
- To disable call forwarding, press menu and select Features and Fwd....
- Select a forwarding type from Always, No Answer, and Busy.
- Press the Disable soft key.

## REDIAL

- Press the redial button to redial the most recently dialed number.

## VOICE MAIL\*

- The Message Waiting Indicator LED on the front of the phone and individual line LED indicators will flash and stutter dial tone in place of normal dial tone will sound to indicate that message(s) are waiting at the message center.

To listen to voice messages:

- Press the envelope (messages) key
- Follow voice prompts to listen to messages.

\*Voice Mail is an optional feature that must be configured on the call server. Particulars and menu options may vary.

## VOLUME ADJUSTMENT

Press the volume keys to adjust handset, headset, and handsfree speaker volume during a call. Pressing these keys in idle state adjusts the ringer volume. To conform to regulatory requirements, handset and headset volume will return to a preset level after each call, but the configuration can be changed. Handsfree volume settings will be maintained across calls.
